AWARDS

This is to certify that

FEA Academy

has been awarded

**Engineering Education &
Training Provider of the Year**

in the Corporate
LiveWire Global
Awards 2024/25

ENGINEERING EDUCATION & TRAINING PROVIDER OF THE YEAR

FEA Academy

www.fea-academy.com | +1 514 265 0561 | dominique.madier@fea-academy.com

FEA Experts and FEA Academy are dedicated to advancing engineering excellence through expert finite element analysis (FEA) consulting, extensive training programmes and leadership coaching. Bridging the gap between theoretical knowledge and real-world application, the academy provides high quality training and consulting services to engineers, students and industry professionals. Its courses and mentorship programmes are designed to equip learners with the technical expertise needed to excel in numerical simulation, structural analysis and advanced engineering problem solving. Founded by Dominique Madier, a recognised expert in the field and author of *Practical Finite Element Analysis for Mechanical Engineers*, FEA Academy has made a name for itself through a practical, application-driven approach.

Unlike traditional academic programmes that often focus heavily on theory, FEA Academy prioritises hands-on learning, ensuring that engineers develop the skills necessary to tackle real-world engineering challenges with confidence. The structured, on-demand courses guide learners through essential concepts such as linear and nonlinear analysis, meshing techniques and verification processes. The academy's incorporation of real engineering problems into the curriculum ensures that participants are well-versed on theoretical principles, while also teaching them how to implement them in real-world scenarios. This type of training is extremely pertinent to engineers working in industries where simulation-driven design plays a critical role.

The judging panel were particularly impressed by FEA Academy's mentoring and coaching services, customised specifically for engineers and technical managers. Engineers looking to refine their skills and advance in their careers receive personalised guidance from experienced mentors, while managers gain the leadership skills necessary to optimise team performance and make strategic, simulation-driven decisions. By blending theoretical foundations with real-world applications, developing an engaged learning community and offering personalised mentorship, FEA Academy provides a peerless educational experience. The academy offers professionals an essential training ground, equipping learners with the expertise to solve complex engineering challenges with confidence and precision.

FEA Academy delivers expert, practical training in finite element analysis, bridging theory and industry applications through hands-on learning, mentoring and community engagement.

Dominique Madier

“I’m honored and deeply grateful to receive this recognition.

This award celebrates not only FEA Academy’s growth - but a mission to empower engineers with practical, simulation-driven skills that truly make an impact.”

Dominique Madier
